SUMMARY

Software Engineer with over 7 years of hands-on experience, specializing in **Java Spring Boot**, **JavaScript**, **React.js**, and **Python**, with a strong foundation in Computer Science. **AWS Certified Solutions Architect** and **Developer**, proficient in leveraging AWS services to design and deploy scalable, secure cloud solutions. Adept in using modern tech stacks including **Terraform**, **Jenkins**, **Git** and **Docker** and experienced with serverless architectures to automate tasks and improve system efficiency. Passionate about staying updated with emerging technologies to deliver high-quality software solutions.

EDUCATION

Master of Science in Computer Science, GPA 3.6/4.0

Saint Louis University, Saint Louis, MO

Jan 2021 – Dec 2022

Bachelor of Science in Computer Science, GPA 3.3/4.0

VNR VJIEIT, Hyderabad, India

Sep 2012 – May 2016

SKILLS

Programming Languages: Python, Java, HTML, CSS, JavaScript, React.js, C, C++, C#, PHP, MySQL, Node.js

Technologies and tools: Maven, Terraform, AWS, Azure, Git, CI/CD, MongoDB, Docker, Kubernetes, Jenkins

WORK EXPERIENCE

Department of Labor

Austin, TX

Software Engineer

Nov 2024 – Present

- Developed Lambda functions in **Python** to generate pre-signed URLs for secure file uploads, downloads, and metadata retrieval using S3 Access Points via API Gateway, enabling efficient and controlled access to S3 bucket.
- Implemented CI/CD pipelines using Terraform, Jenkins, and GitLab to provision and manage AWS infrastructure, including services like Lambda, S3, API Gateway, Textract, Transcribe, EventBridge, CloudWatch, SNS, and SQS.
- Automated document and media processing workflows by integrating AWS Textract for OCR and AWS Transcribe for audio/video transcription, while leveraging CloudWatch for debugging, EventBridge for orchestration, and SNS/SQS for asynchronous messaging and notifications.

The Drop Times

Saint Louis, MO

Software Engineer

Sep 2024 – Oct 2024

- Built a full stack Leave Management System using Spring Boot and React.js, implementing microservices with RESTful APIs to handle complete CRUD operations and real-time leave balance tracking via JPA and Controllers.
- Implemented secure authentication using JSON Web Tokens (JWT) and React Auth Context for session management, with React Hooks used to manage state and data flow on the frontend.
- Designed and deployed the system using Maven for builds, developed Java code in Visual Studio Code, structured relational data with MySQL/MariaDB, and contributed to database schema design.

Saint Louis University

Saint Louis, MO

Software Engineer

Apr 2023 – Sep 2024

- Designed and implemented an automated solution for creating S3 buckets to store and manage CSV files using serverless architecture and terraform.
- Utilized AWS CloudWatch Events or other event sources to trigger Lambda functions, ensuring seamless and real-time bucket creation and file upload.
- Developed Python scripts as Lambda functions to process a large-scale CSV file stored in an AWS S3 bucket, employing efficient data manipulation techniques.

IBM

Bangalore, INDIA

Mainframe System Programmer

Sep 2016 – Dec 2020

- Applied **Shell scripting** to automate tasks that significantly decreased manual testing overhead by 50% and enhancing system reliability.
- Proficiently applied software patches and updates to 7 mission-critical mainframe products, ensuring system stability, security, and compliance with industry standards.
- Transitioned seamlessly to modern development tools and methodologies using Agile practices, ensuring a smooth integration into software development teams reducing technical debt to 30%.
