PROFESSIONAL SUMMARY

Software engineer with 7+ years in backend systems, including 3+ years building serverless AWS applications and Java/Spring Boot microservices. Experienced in AWS Lambda, API Gateway, Aurora PostgreSQL, Terraform, and CI/CD, with a record of improving reliability, database performance, and delivery speed.

TECHNICAL SKILLS

- **Core:** Java, Spring Boot, Microservices, REST API design, Hibernate/JPA, Event-driven architecture
- **AWS:** Lambda, API Gateway, S3, Aurora PostgreSQL, RDS Proxy, IAM, Secrets Manager, Step Functions
- **Delivery & testing:** Terraform, GitLab CI/CD, Jenkins, Maven, Git, JUnit 5, Mockito, TDD
- **Also familiar with:** DynamoDB, Bedrock, MongoDB, Docker, Kubernetes, SonarQube, Node.js, Python

---

PROFESSIONAL EXPERIENCE

Java Consultant | Force Focus — Chennai, India
Jan 2026 – Present

- Designed and deployed production-grade Java microservices using AWS Lambda and API Gateway, establishing core serverless infrastructure handling high-concurrency workloads.
- Engineered secure file-management pipelines using Amazon S3 pre-signed URLs, enabling fine-grained, controlled object uploads and downloads for external integrations.
- Implemented Amazon Aurora PostgreSQL with RDS Proxy connection pooling, eliminating database connection bottlenecks and improving query execution times across serverless instances.
- Centralized dynamic application configuration and credential management using AWS Systems Manager Parameter Store and AWS Secrets Manager, enforcing strict enterprise security standards.
- Elevated code quality standards by authoring automated unit test suites using JUnit 5 and Mockito to achieve 90%+ branch and line coverage; leveraged AWS SAM CLI for local API emulation.
- Mentored 3 backend developers on serverless design patterns, leading technical design discussions, conducting code reviews, and establishing robust coding benchmarks.

Software Engineer | Zyxware Technologies — Austin, TX, USA
Sep 2024 – May 2025

- Architected a secure document automation backend supporting 6 federal programs, processing high-volume document intake via AWS S3 and automated Amazon Textract OCR pipelines.
- Developed 12+ RESTful Spring Boot microservices providing optimized CRUD capabilities, pagination, and multi-field filtering for workforce management applications.
- Crafted a secure API authentication framework utilizing JWT and RBAC across 10+ user roles.
- Optimized SQL query execution plans and JPA caching strategies, driving a 25% performance improvement in API response times and reducing redundant database roundtrips.
- Built secure API Gateway endpoints accepting multi-part 11MB+ payloads directly to isolated S3 access points, bypassing backend server bandwidth bottlenecks.
- Modernized legacy Treasury Management System services into Spring Boot microservices, boosting overall system resiliency, modularity, and operational fault tolerance.
- Streamlined infrastructure provisioning by authoring Terraform scripts integrated into GitLab CI and Jenkins pipelines, cutting overall deployment lead times by 60%.
- Designed event-driven processing microservices using AWS Lambda and CloudWatch to parse, classify, and route incoming documents into automated workflow state machines.

Backend Developer | Saint Louis University — Saint Louis, MO, USA Apr 2023 – Sep 2024

- Engineered a serverless CSV ETL pipeline with AWS Lambda and S3, eliminating 50% of manual data processing overhead and automating dynamic report generation using Python Pandas.
- Developed an automated optical mark grading backend utilizing Flask APIs and OpenCV computer vision algorithms to process scan sheets in real time.
- Led sprint planning, code reviews, and stakeholder communication as Tech Lead for a 5-engineer Agile team.

Software Engineer (Z/OS) | IBM — Bangalore, India Sep 2016 – Dec 2020

- Maintained mission-critical backend batch engines processing 100K+ daily transactions for FedEx Express & Freight with 99.9% uptime SLA compliance.
- Performed deep-trace log analysis using IMS, CICS, and DB2 diagnostic suites, reducing mean-time-to-resolution (MTTR) for critical faults by over 40%.
- Executed blue/green failover strategies and GDPS migrations across 5 distributed mainframe platforms, maintaining continuous system availability during patch releases.

EDUCATION

Master of Science in Computer Science (GPA: 3.6 / 4.0) Saint Louis University, USA — Dec 2022

Bachelor of Science in Computer Science (GPA: 3.3 / 4.0) VNR VJIET, Hyderabad, India — May 2016

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (Issued: March 2025)
- AWS Certified AI Practitioner: In progress.
