

RAJU KARMURI

Austin TX | +1-224-520-0851 | rajukarmuri731@gmail.com | [linkedin/rajukarmuri731](https://www.linkedin.com/in/rajukarmuri731/) | github.com/rkarmuri

SUMMARY

Software Engineer with over 7 years of hands-on experience, specializing in **Java Spring Boot**, **JavaScript**, **React.js**, and **Python**, with a strong foundation in Computer Science. **AWS Certified Solutions Architect** and **Developer**, proficient in leveraging AWS services to design and deploy scalable, secure cloud solutions. Adept in using modern tech stacks including **Terraform**, **Jenkins**, **Git** and **Docker** and experienced with serverless architectures to automate tasks and improve system efficiency. Passionate about staying updated with emerging technologies to deliver high-quality software solutions.

EDUCATION

Master of Science in Computer Science, GPA 3.6/4.0

Saint Louis University, Saint Louis, MO

Jan 2021 – Dec 2022

Bachelor of Science in Computer Science, GPA 3.3/4.0

VNR VJIE, Hyderabad, India

Sep 2012 – May 2016

SKILLS

Programming Languages: Python, Java, HTML, CSS, JavaScript, React.js, C, C++, C#, PHP, MySQL, Node.js

Technologies and tools: Maven, Terraform, AWS, Azure, Git, CI/CD, MongoDB, Docker, Kubernetes, Jenkins

WORK EXPERIENCE

Department of Labor

Austin, TX

Software Engineer

Nov 2024 – Present

- Engineered a secure document management workflow, using Python Lambda, and API Gateway; automating virus scans and routing to Textract or Transcribe reducing manual effort by 70%.
- Streamlined AWS infrastructure provisioning using Terraform and integrated with Jenkins, GitLab CI/CD, cutting deployment time by 60%; enforced high code quality through SonarQube, reducing bugs by 30% across releases.
- Modernizing a Spring Boot-based Treasury Management System by deploying scalable RESTful microservices on AWS, boosting performance and scalability by 40%.

The Drop Times

Saint Louis, MO

Software Engineer

Sep 2024 – Oct 2024

- Developed and deployed a scalable Task Management System and Leave Management System using Spring Boot, React.js, and MySQL, streamlining internal workflows and improving productivity by 30%.
- Implemented secure authentication using JSON Web Tokens (JWT) and React Auth Context for session management, with React Hooks used to manage state and data flow on the frontend.
- Optimized RESTful APIs for backend services, achieving a 25% performance improvement in data retrieval, and ensuring scalability for future enterprise-level requirements.

Saint Louis University

Saint Louis, MO

Software Engineer

Apr 2023 – Sep 2024

- Developed a serverless data ingestion pipeline using Python Lambda and S3, reducing onboarding time for large CSV datasets by 50%, increasing efficiency for data-driven departments.
- Automated file processing with EventBridge and CloudWatch, enabling real-time S3 bucket provisioning and seamless uploads across systems.
- Provisioned infrastructure via Terraform, improving reproducibility and reducing errors during deployment.

IBM

Bangalore, INDIA

Mainframe System Programmer

Sep 2016 – Dec 2020

- Conducted system validation and testing tasks using Shell scripting, reducing manual testing hours by 50% and increasing deployment confidence.
- Proficiently applied software patches and updates to 7 mission-critical mainframe products, ensuring system stability, security, and compliance with industry standards.
- Transitioned seamlessly to modern development tools and methodologies using Agile practices, ensuring a smooth integration into software development teams reducing technical debt to 30%.
